## FULL-STACK WEB DEVELOPER

Hi there! I'm Muhammad Munir a Software Engineer and Full Stack Developer in my final year of Computer Science at IIUI. I build responsive web applications using modern tools like JavaScript, Node.js, MongoDB, and Tailwind. I enjoy solving problems, creating impactful solutions, and continuously learning in web development and data analysis.

## KEY COMPETENCIES

|                       |                        |                            |
|-----------------------|------------------------|----------------------------|
| React (Nextjs)        | Analytical Thinking    | Self-motivated and focused |
| REST API Integration  | Problem-solving Skills | Strong work ethic          |
| MongoDB Data Modeling | Clear Communication    | Organized and reliable     |
| Postman for Apis      | Cloud Deployment       |                            |

## PROFESSIONAL EXPERIENCE

### Full Stack Developer – Project: Rentistaan

Apr 2025 – Jul 2025

Developed a rental web app using the MERN stack as part of the Navttac program. Deployed frontend on Vercel, backend on Railway, and used MongoDB Atlas and Cloudinary. Users can post and rent items. Gained hands-on experience in full-stack development and deployment.[link](#)

### Full Stack Todo App Project

July 2025 - Aug 2025

Created a fully responsive Todo App with advanced features such as JWT-based authentication, a user dashboard, and an admin dashboard. The app allows users to manage their daily tasks efficiently, while the admin dashboard provides tools to oversee user activity and manage the system. Built with a focus on security and scalability, the app includes custom login functionality, role-based access control, and seamless client-server communication. This project strengthened my understanding of authentication workflows, state management, and responsive design principles.[link](#)

### Blog Website

May 2025 - Jul 2025

Developed a full-stack blog platform where users can create, view, and manage blog posts. Built features like user authentication, blog posting, and admin dashboard to manage all users and content. This project improved my understanding of CRUD operations, role-based access, and how to handle real-world web app flows. [link](#)

## Portfolio
